Utilities Service Provider

"We have been working with GoWork Solutions for the last six months to provide quality business to business appointment setting services to leading utility providers in the UK.

The GoWork Solutions management team has demonstrated excellent account management skills and has worked alongside our existing UK management team rather than as a separate entity. They have consistently delivered high quality appointments throughout this period helping to achieve good results for both companies.

We would recommend GoWork Solutions as a reliable and cost-effective service provider; clearly experts in their field and we look forward to a long and mutually profitable relationship with them."

Computer Peripherals Company

"I will be delighted to recommend your business and I have already done so to a company in the UK. I have found your services to be very proactive and focused on my results. The quality and quantity of calls would appear to be as good as the UK but obviously at a lower cost".

- **Managing Director**

Publishing Company

- **Managing Director**

Insurance Company

"We had a need to build a UK database quickly with accurate information across a number of verticals. We sourced the raw data and started to talk to 4 outsourced companies in India and UK. The UK companies failed to listen accurately to the importance of our approach resulting in an unclear proposal with little guidelines as to end cost due to unknowns from agent efficiencies. GoWork Solutions provided a differentiator in that they have a Kiwi running the operation onsite as well as having worked within the UK OCC industry for some years previously. The cost differentiator, coupled with a no-nonsense proposal assured us that we were on the right track. Bespoke reporting has worked to our advantage in order to cut down on extra work in UK data importing.
